MOONSLATE CONSULTING

Capability Statement

The engine is yours.
We make sure it runs.

moonslateconsulting.com

MoonSlate is the independent transformation advisory firm for complex enterprises. We are the assurance and governance function on large transformation and AI programs: we work only for you, alongside your integrator and your vendors, so the program lands on budget, on schedule and adopted by the people who run it.

WHEN PEOPLE CALL US

- Before a transformation business case is committed
- When an in-flight program has drifted
- When go-live is close and readiness has to be proven
- When AI pilots are multiplying without a governed path
- When assurance and delivery report through the same line

HOW WE WORK: PITWALL

Get on track. Stay on track. Realize value. A race isn't run from the car, and it isn't run from the garage. It's run from the pit wall: the one seat that sees the whole race, calls the stops, and gives the driver a clear, current picture. That is the seat we take on your program.

Command Center

The row of named seats that runs your program: four decision domains, one escalation path, one cadence.

Golden Thread

Every requirement traced through design and solution to validation and adoption.

Day in the Life

Gated walkthroughs that prove your people can operate the business on go-live day.

OUR DELIVERY PLATFORM

UNYFi is wholly owned MoonSlate intellectual property, included in the engagement rather than sold. Readiness, requirements traceability and the integrated plan in one place, so a steering committee gets one agreed number with the evidence behind it.
